Cable Laying Vessel

Features

- DP 2
- 4,500T of cable in 1 or 2 turntables
- Shallow draught operation
- Beachable
- Spud-cans & 4-point mooring

Atalanti

The **Atalanti** is a DP-2 Cable Laying Vessel that has been specially designed and engineered for cable laying and protection works in shallow waters, which are not normally accessible by large cable laying vessels. She can handle at least 4,500 tons of cable in one or two electro-hydraulically operated Turntables, on a maximum draught of 4.26 meters.

High-standard accommodation facilities for a total of 77 persons are provided, offering ideal hotel facilities for lengthy projects in remote areas of the world.

The vessel is fitted with an ABS-certified Class II Dynamic Positioning System which controls the vessel's five (5) 1,000 HP Azimuthing thrusters and one (1) 2,400 HP Voith Schneider Propulsor.

The vessel also features two (2) specially designed "spud cans" for position keeping redundancy while operating in shallow waters and a 4-point mooring system consisting of four 30-Ton pull anchor winches (2 fore and 2 aft) each fitted with 800m of wire rope and a 5t Flipper-Delta anchor.
